PROFESSIONAL SUMMARY

Product Designer with 3+ years of experience designing B2B SaaS products across EV charging, fleet management, and data-driven platforms. Strong in UX strategy, interaction design, design systems, prototyping, and usability testing. Known for turning complex workflows into clear, scalable experiences across web and mobile while improving usability, consistency, and delivery speed.

WORK EXPERIENCE

UI/UX Designer — Steam-A

Jul 2023 – Present

- Lead end-to-end product design for EV Charging Management Systems (CMS), fleet platforms, and mobile applications
- Improved task completion rates by ~30% by redesigning user flows and simplifying dashboards
- Built and scaled a design system that reduced UI inconsistencies by 25% and accelerated design-to-development cycles
- Partner with product managers, stakeholders, and engineers to shape requirements and align design decisions with business goals
- Conduct user research, usability testing, and iterative design improvements to strengthen product performance

Key Contributions

EV Charging Management System (CMS & Mobile App)

- Mapped end-to-end journeys for charger discovery, booking, live session tracking, and payments
- Introduced real-time feedback for status, errors, and availability to improve clarity and user trust

Fleet Management System

- Shaped scheduling and charge allocation workflows to support efficient fleet operations
- Created monitoring dashboards with real-time vehicle and charger visibility

Asset Management System (R-one)

- Defined lifecycle flows for EV chargers across onboarding, diagnostics, and maintenance
- Built dashboards to track asset health, uptime, and faults

AI Chatbot for Analytics (Sense)

- Designed a conversational interface for querying EV network data in natural language
- Turned analytical requests into intuitive chat interactions for non-technical users

Energy Trading Platform (Aatral)

- Crafted onboarding, wallet management, and peer-to-peer energy trading flows
- Strengthened user trust with transparent feedback and transaction states

Multi-Tenant SaaS Platform

- Structured role-based access, permissions, and tenant configuration flows
- Helped shape a scalable setup for multiple organizations with isolated data

Design System

- Built reusable components, tokens, and guidelines across products
- Standardized interaction patterns, typography, and visual language

Planet 3 Energy RMS

- Served as **Product Manager** for a client-facing project from requirements through release
- Translated business needs into product features, workflows, and UX decisions

UI/UX Designer — KGX Innovation

Jun 2022 – May 2023

- Designed enterprise web experiences that improved usability and navigation clarity
- Increased task efficiency by ~25% through stronger interaction patterns
- Created wireframes, prototypes, and high-fidelity designs aligned with business goals
- Collaborated with developers to ensure accurate implementation of designs

SKILLS

Product Design:	UX Design, UI Design, UX Strategy, Interaction Design, Information Architecture, User Research, Wireframing, Prototyping, Design Systems, Usability Testing, Accessibility (WCAG), Dashboard Design, Data Visualization
Tools:	Figma, Adobe XD, Illustrator, After Effects, Framer, ProtoPie
Development:	HTML, CSS, JavaScript, React, Node.js, Tailwind CSS
Other:	Agile Methodologies, Stakeholder Management, Product Thinking, Business Analysis, A/B Testing, Cross-functional Collaboration

ACHIEVEMENTS

- Received the Promising Deliverer of the Year award (2023–2024) at Steam-A
- Helped deliver a full-scale EV charging platform across web and mobile
- Recognized for ownership, collaboration, and reliable delivery across teams

EDUCATION

B.E. Computer Science Engineering

KGiSL Institute of Technology, Coimbatore
2019 – 2023

CERTIFICATIONS

- Google UX Design Professional Certificate
- UI/UX Design Specialist – Great Learning
